Shame to see this game be completely dead, refreshed server browser to find 1 server in sydney with 2 people in it. its a good game tho. Bought coz i have fun with this game when i was little baby. A good game that suffers terribly from a lack of fast travel, Sacra Terra is an enjoyable HOG that can be completed in roughly 3 hours, depending on how quickly you speed through. The story is decent enough, and there is enough variety in the areas that you don't feel like you're going back to the same scene over and over again in the main game (the bonus level is a bit more restrained and suffers in repetition as a result). If you enjoy HOGs you'll like this, especially if you enjoyed House of 1000 Doors as there's a similar kind of style to both games.. I loved it, simple as that.. I once visited Kykuit, the estate of the Rockefeller family\u2014possibly the wealthiest family in human history. I thought it was so cool that they had a multi-story art museum in their house.

Now I have a multi-story art museum in my house. And so can you, for the very reasonable price of FREE.

Virtual reality is \u2665\u2665\u2665\u2665ing awesome.. damn I bought this game and there is no one for me to play with so I bought another controller and am now playing with myself, if you are reading this don't bother buying this game because there is no chance in hell you are going to have more fun than I am right now. My left hand just got salty because my right hand is using catbot to pierce through my left hand's vanguard's shield so I was only able to type this review out with my right hand for my left hand is too busy trying to refund the game at the same time. send help.. Just play Golden Axe instead.. I only buy Games that have Steam Trading Cards with them or Achievements....This does not have any cards....Check the market and you will see that there is none. I did buy this with a Discount Coupon 66%.. Lot's of love and thought put into the systems behind this indie game. It's also fun to play. Which is nice.

Hey, Creator, I don't know how to beat the level where you need to go underground. It's the last level before you go to the other biome. I tried everything. I researched it and since the game is basically almost unknown, I couldn't find anything. If you could help that's be amazing! Anyway, It is a great game, I only don't know how to get past that.. Graphics are stunning and the levels are really competitive. Sadly it's too hard for me D: its nerf or nothin. Very nice short story that works well in VR. I have played this game so many hours on dvd, and it is really good, i will recomend this!
